

## SWIFT BOATS AND

When SWIFT Boats and CG 82 footers swing into action the "White Whale," as we are known, hovers protectively off shore ready to provide complete support, from a clean bunk and a hot meal, to plugging bullet holes in a hull. We came to know the crews of these boats very well. With familiarity came profound respect. Their assignments are difficult and dangerous and their performance is outstanding.

SWIFT Boats and 82 footers are high speed patrol craft that operate just off the beach and on inland waterways. They depend on ships like the BIBB for much of their logistical support while underway.
