

LIFE UNDERWAY

Even though *USCGC Dallas* visited some special ports and formed some very special memories, *Dallas* got down to the business of a 378' being underway. Life underway can not be captured by a single photograph. On the pages that follow, these few photographs try to give a flavor of the good times and hard times underway. Although some pictures need no explanation to us, the crew, the future generations may be a little in the dark.

On this page LTJG Downs and QM3 Seastrand are going over finer points of navigation. ET3 Lacy proves that standing quarterdeck watch can be exciting. The engineers are just kicking back in main control. LTJG Bauer is trying to figure out how to use her chin strap, but it just would not fit. LTJG Corrwell is doing one of his many jobs, standing his OOD watch.
