

SIXTEEN HUNDRED

Swift boats return to INGHAM with the MEDCAP team and tie-up along side to receive fuel, food and change crews. We replenished 146 smaller vessels which included U.S. Navy, Coast Guard, Thai, and South Vietnamese Navy. We also offered the services of a floating repair facility. PCF-36 was hit by a Viet Cong grenade during a Sea Lords mission and is shown rigged out on our small boat falls to prevent it from taking on water through the hole in its port side. Our divers performed repairs and removed many nets from boats with fouled screws.
