

*A SOUTH TRIP!! That mystical thing that most coasties yearn for, but few ever experience. Just what is a SOUTH TRIP? It's a lot of things to a lot of people. Our trip was a full cross section of all to expect. A journey to the "last place on earth, Antarctica!" We enjoyed seals, whales and penguins in their own environment. We played on the ice covering Mcurdo Sound. We repaired casualties that would have stopped lesser crews in their tracks . . . and went on to conquer the toughest ice on record. To and from we made 12 portcalls in six countries on four continents. We sailed four of the seven seas to complete our voyage. Lots to remember . . . but years from now what we'll want to remember most is the people — our friends, shipmates. These pages will help us do it. ENJOY!!!*
