

## MAA MASTER AT ARMS FORCE

The MAA Force, consisting of 15 Seamen and Seaman Apprentices, are responsible for the maintenance and general cleanliness of most of the community and living spaces on board. They also maintain certain fire fighting and damage control equipment within assigned spaces. Other duties assigned to them consist of mess cooking in the crew's, officer's and chief's mess, and are on call at any time for any emergency that may arise. In addition to all these routine duties, they also tend and care for the POLAR SEA'S brown trout ponds, a duty they thoroughly enjoy!
