

## another thule visitor's day

Each summer a singing group composed mostly of girls leaves the campus of Clarke College and tours under the USO program. Last year they were in Vietnam; this year they were in Greenland, Iceland, and a few other places around the North Atlantic. Coincidentally they were in Thule at the same time as a SOUTHWIND visit and managed to make it aboard for a look around (right) and a short performance in their hootnary style (below).
