

Cribb helping with main engine overhaul.

Below the laundry and chief's quarters is located a highly complex mass of machinery and equipment which comprises B-2 engine room. Here are located the systems for sanitary flushing for the heads, cooling water for the reefers and chill boxes, and providing fresh water for the crew's and ship's use. Other equipment contained in B-2 is the main fire pump for **Westwind** and the complete system for producing low pressure air.

Like her sister engine rooms, B-2 is equipped with two Fairbanks-Morse opposed piston engines used for generating electrical power for the main motors.

The maintenance of the equipment in this compartment by personnel of B-2 provided many services needed by **Westwind** and the propulsion to get her home. Rumor has it that they give out silver stars for good performance in this department. The Chief might be able to shed a little light on this subject — that is if he were asked.

B-2

Front Row: FA W. Cribb, FN J. Rogers, FA D. Deere, FA L. Warren, FA J. Covington; Back Row: D. Whayland, FNEN W. Hutto, LTJG T. Kichline, ENCS G. Fulcher, EN1 J. Lewis, EN1 J. Williams.

Rogers and Whayland work on No. 4 main engine.
